

# about us

We have been involved with the powder coating industry since 1986 in various capacities from operations to sales. We pride ourselves on being a full service provider with products and services that are both useful and complete.

In this brochure we feature several of our products and services, however, you can find more information on any of our offerings by visiting us at [huskerfinishingequipment.com](http://huskerfinishingequipment.com)

Yours truly,  
Husker Finishing Equipment

- Rotary Sieves

## Services

- Powder Gun Repair
- Powder Booth Refurbishing

# Powder Hoppers

## Round

These attractive yet functional hoppers are available in 10#, 15# & 50# sizes and are designed for ease of maintenance with their 3 piece design. Our hoppers are affordable enough to be dedicated to a single color, however, are flexible enough to allow for easy color changes.

## Square

Husker Finishing Equipment also has square hoppers available for the production powder coater. These hoppers have the same easy three piece construction while allowing for multiple gun connections and reclaiming ability.

# Cartridge Filters

- Uniform pleat spacing
- High-flow spun bond media
- Direct filter replacement
- Double gasket option for "Binks" booths

The ColorBOARD color management system is available in wall mount, rail mount or cart mount. You simply supply the compressed air and the powder guns and the ColorBOARD does the rest. Color changes can now be done in under 30 seconds, in four easy steps...

# Batch Ovens

Our batch ovens represent EXCELLENT VALUE at a COMPETITIVELY LOW PRICE. If you are interested in our batch powder coating equipment we invite you to contact us. We do not use high pressure sales tactics, we'll simply give you a price and let you decide if you want to make the purchase... on your own time!! We can take this approach simply because we know that you WILL NOT FIND a better value for your money!!

1. Disconnect the powder feed hose from the previous color
2. Clean out the powder hose/powder gun with the blow down hose provided
3. Reattach the powder feed hose to the upcoming color via our exclusive quick couplers
4. Move both tubes of control air to the upcoming color via quick disconnects

Less time changing colors = more time spent powder coating!!!

# Powder Gun Repair

- Replace missing or broken parts
- Check operation and KV output
- We can repair virtually any make of powder booth or gun
